

The APUS - Group develops aircraft and aircraft systems for the general aviation from gliders up to CS-23 applications. Those projects are directly customer related or own projects. For the strengthening of our [airworthiness department](#) (EASA.21J.638), we are looking for an

## **Airworthiness / Certification Engineer (m / f)**

at the Strausberg airport (near Berlin).

### Your areas of responsibility

- Analysis of customer- and certification requirements
- Preparation of means of compliance lists and certification programs for different projects
- Planning, supervision and documentation of ground- and flight-tests
- Management of requirements within technical projects
- Creation of technical documentation and preparation of compliance reports
- This position is reporting to the head of airworthiness

### Your profile

- University degree in aerospace engineering, mechanical engineering or a similar field
- At least 2 years of professional experience in technical development
- Good knowledge of foreign languages in English and preferably German
- Good knowledge of airworthiness requirements and codes (CS-22 & CS-23) is an advantage
- Experience in Part 21J organizations is an advantage
- Interest in aviation and passion for emission-free mobility

### We offer

An exciting field of activity in various areas related to general aviation and innovative propulsion systems. Our professional and young team would like to welcome you to our EASA-approved design organization. We would like to work with you on pioneering projects and make them fly. Our transparent, dynamic and creative way of working will inspire you. You will quickly be swept away and feel at home with us.

Application deadline: 30.04.2020  
Preferred start of work: short-term  
Vacancy reference id / date: #06 / 11.03.2020
